In September, Amazon removed 20,000 reviews from its website after a Financial Times investigation found UK reviewers may have been paid for their comments. "I bought a blackhead remover and the package it came in contained a card saying "Do you want to receive a gift? Scan this code," she said. "I did that and was redirected to a website that said if I wrote a five-star rating on Amazon I would get my money back. I did it and was amazed when they transferred the money to my PayPal account."

Sometimes the compensation they receive will be even higher than the original cost of the product. On other occasions, especially if the product is expensive, users will keep the product and get a portion of their money back.

Valeria has identified a few of these products, one of which is similar to the iRobot vacuum Roomba.

"The networks say that Amazon is on the alert for these reviews and it's easy to get caught, so there are a lot of rules to follow," said Carla. However, she felt it was worth the trouble for the money she had saved over the Christmas period and over the last few months.

"Any attempt to manipulate Community content or features, including by contributing false, misleading, or inauthentic content, is strictly prohibited,"

Amazon states in its community guidelines.

The delivery giant tries to detect false positive reviews, but also negative ones

that are posted to undermine competitors and lower their product ratings.

Amazon previously told Insider that asking for positive reviews was against their

policy. For now, they encourage their users to click on the "report abuse

" button if they spot any false or misleading behavior, thus providing data

that can enable these networks to be eradicated from the platform.

The state legislature has given the issue a lot of attention since the supreme

court decision, but the lobbying power of the native Indian political groups has

not allowed for a serious effort to be mounted on behalf of the gambling enthusiasts.
