com: A 50-state guide to legal betting sites and regulated online gambling in the United States.

Online gambling is a complicated and politicized issue in America.

However, passing legislation takes time and is often a complex issue that involves navigating the competing interests of industry stakeholders, lawmakers, and the public at large.

As we wait for additional states to pass sports betting legislation, we can look at those that have already legalized online wagering as an indication of what's to come.

In all such states, online gambling has proven profitable and able to be effectively regulated.

Other media companies' interests are often more aligned with shareholders' results than the quality of experience players are getting at US sports betting sites.

The IRS considers all gambling and sports betting winnings taxable income.

We also have daily NBA Computer Picks whereby our supercomputer runs over 10,000 simulations to predict the score and outcome of each game.

Because of the way the money line is often priced in the NBA, the tricky part is finding the best value NBA money line picks, and avoiding the sports where ups and downs are more likely.

Betting against the spread on the NBA means you're not wagering on a team to win, but to either win by a certain number of points or to lose by fewer than a certain number of points.

Let's say we go against the Golden State Warriors in the above example and we take the points.
