PayPal is completely free to use to make payments online at a variety of different vendors.

A user will deposit money into his or her PayPal account via bank transfer, debit card or credit card and then use the money at online casinos.

PayPal users can also link a credit card to the account so that PayPal can make automatic withdrawals when it is used as a depositing method at online casinos.

This ensures that sensitive credit card information is shared with only one site when making payments online.

Doing that will also help you regulate the amount of money you spend, and keep track of your winnings easier.
